

# Exodus 36:28

Authorized King James Version (KJV)

And two boards made he for the corners of the tabernacle in the two sides.

## Analysis

---

Two corner boards (קֶרֶשִׁים, kerashim) for the tabernacle's back corners demonstrate attention to structural integrity even at junction points. Corners, where sides meet, require special reinforcement—illustrating that transitions and connections need particular care in building God's house. These corner boards prevented gaps and maintained stability, teaching that God's dwelling allows no weakness, no undefined space, no vulnerable joints. The church similarly requires careful attention to how different parts connect.

## Historical Context

---

Corner boards likely had special shaping or were positioned at angles to join the north/south walls to the western wall, creating stable right-angle corners. These joints bore significant stress during assembly/disassembly and transport, requiring robust construction.

## Related Passages

---

**Colossians 1:16** — All things created through Christ

**Genesis 1:1** — Creation of heavens and earth

## Study Questions

---

1. What do the special corner boards teach about attention to connections and transitions in building God's house?
2. How does structural reinforcement at junction points illustrate the importance of careful attention to how different parts of Christ's body connect?

## Interlinear Text

---

וְשָׁנֶה	בָּרְכָתִים	בְּרָכָתִים:	הַמִּשְׁכָּן	לְמִקְזָעַ תְּעַשׂ הַזְּבָשִׁים	תְּעַשׂ הַזְּבָשִׁים	וְשָׁנֶה	בָּרְכָתִים
And two	boards	boards	of the tabernacle	he for the corners	made	boards	in the two sides
