

# Exodus 39:20

Authorized King James Version (KJV)

And they made two other golden rings, and put them on the two sides of the ephod underneath, toward the forepart of it, over against the other coupling thereof, above the curious girdle of the ephod.

## Analysis

---

Two more golden rings on the ephod's lower front, 'underneath' and 'over against the other coupling,' created attachment points for the breastplate's lower rings. The phrase 'over against' (לְעִמָּתּוֹ, le-umat, corresponding to) indicates precise alignment—divine design tolerates no sloppiness. The 'coupling' (מַחְבֵּרְתּוֹ, machbarto, joining) reference shows how multiple connection points create secure unity. This multi-point attachment system prefigures believers' multi-faceted union with Christ—justified, adopted, sanctified, sealed—secured through numerous covenant bonds, not a single fragile thread.

## Historical Context

---

The rings' position 'underneath' meant they connected on the ephod's underside, invisible to observers but essential for function. This hidden engineering ensured the breastplate remained properly positioned even during the high priest's vigorous sacrificial activities.

### Study Questions

---

1. How does your multi-faceted union with Christ (justification, adoption, sealing) provide layered security?
2. What does God's precision in alignment ('over against') teach about His ordered, purposeful design for the church?
