

Job 39:11

Authorized King James Version (KJV)

Wilt thou trust him, because his strength is great? or wilt thou leave thy labour to him?

Analysis

"Wilt thou trust him, because his strength is great? or wilt thou leave thy labour to him?" The wild ox's great strength makes it seem perfect for labor, yet it remains unreliable for human purposes. The verb batach (בָּתַח, "trust") highlights the issue —power without controllability isn't useful. This teaches that strength apart from submission to proper authority becomes dangerous or useless. Spiritually, this anticipates that human ability must be surrendered to divine purposes to become truly useful.

Historical Context

Ancient agriculture relied on domesticated oxen. The wild ox's strength without trainability illustrated that power requires proper channeling to serve productive purposes. This would remind readers that raw capability means nothing without submission to rightful authority and purpose.
